

# NOTES

---

## PART 1 INTRODUCTION

- 1 The infant mortality rate in Norway is one in 250. UNDP (2007).
- 2 UNDP (2005).
- 3 WHO (2010) 'Maternal Mortality' Fact Sheet.
- 4 WHO: Global Health Observatory (2011) 'Child Health'.
- 5 Per capita spending on health ranges from an average of more than \$3,000 in high-income OECD countries with the lowest health risks to an average of \$78 in low-income countries with the highest risks. It is far less in many of the poorest countries. UNDP (2005) op. cit.
- 6 UK Department of Health (2005).
- 7 A. Ciconello (2007).
- 8 Scheduled castes have been known as 'untouchables', although the term is not in current use.
- 9 DFID (2005) *Reducing Poverty by Tackling Social Exclusion*.
- 10 L. Kruzenga (2004) pp.13, 3; J.S. Frideres (1998).
- 11 *Times of India* (2011).
- 12 I. Ortiz and M. Cummins (2011).
- 13 S. Klasen and C. Wink (2003) pp. 263–99.
- 14 For a more detailed discussion of the nature, extent, and current trends in inequality, see D. Green (2006) 'Equality, Inequality, and Equity'.
- 15 E. Anderson and T. O'Neill (2006).
- 16 Gender parity in education is the only aspect of inequality explicitly addressed in the MDGs.
- 17 See the following reports for a summary of the literature on changing views of equality: World Bank (2006) *World Development Report 2006*; UNDP (2005) op. cit.; UN Department of Economic and Social Affairs (2005) op. cit.
- 18 A. Verschoor, A. Covarrubias, and C. Locke (2006).
- 19 Chronic Poverty Research Centre (2004) op. cit.
- 20 2010 GDP per capita, PPP (current international \$), <http://data.worldbank.org/indicator/NY.GDP.PCAP.PP.CD>
- 21 L. Chandy and G. Gertz (2011).
- 22 UNDP (2005) op. cit.

## FROM POVERTY TO POWER

- 23 SIPRI (2011).
- 24 R. Chambers (1997).
- 25 R. Chambers et al. (2000).
- 26 The Millennium Development Goals were agreed by the international community in 2000, and set a number of targets for improvements in areas such as health, education, and poverty. See: [www.un.org/millenniumgoals](http://www.un.org/millenniumgoals)
- 27 World Bank (2008).
- 28 UN Department of Economic and Social Affairs (2006) op. cit.
- 29 J. Beall and S. Fox (2006).
- 30 World Bank (2008) op. cit.
- 31 UN Department of Social and Economic Affairs (2006) op. cit.
- 32 World Bank (2008) op. cit.
- 33 WHO Fact Sheet (2011) 'Malaria'.

- 161 G. Hesselbein et al. (2006) op. cit.
- 162 G. Mulgan (2006) op. cit.

## PART 3 POVERTY AND WEALTH: THE ROLE OF MARKETS

- 1 A. Sen (1999).
- 2 J. Stiglitz (2000).
- 3 There are, however, sub-schools of neoclassical economics that seek to explain institutions such as marriage and behaviour such as criminality using the tools of economics (see, for example, Gary Becker (1992) 'The Economic Way of Looking at Life', Nobel Prize lecture, [http://nobelprize.org/nobel\\_prizes/economics/laureates/1992/becker-lecture.html](http://nobelprize.org/nobel_prizes/economics/laureates/1992/becker-lecture.html)).
- 4 Many influential neoclassical thinkers are, however, classical liberals with a firm belief that markets are the best way to deliver democracy and individual rights. See, for example, Milton Friedman (1980) *Free to Choose*, Fort Washington PA: Harvest Books; or Friedrich Hayek (1944) *The Road to Serfdom*, Chicago IL: University of Chicago Press.
- 5 There has, however, been increasing interest in equity in recent years: see World Bank (2005) *World Development Report 2006* for references.
- 6 See, for example, N. Folbre (1994).
- 7 L. Goldschmidt-Clermont and E. Pagnossin-Aligisakis (1995).

- 8 A. Latigo (2005) 'A New Round of Time-use Studies for Africa: Measuring Unpaid Work for Pro-poor Development Policies', paper presented at UNDP/Levy Economics Institute Global Conference on Unpaid work and the Economy, 1–3 October 2005. 64 See: <http://faostat.fao.org/site/636/default.aspx>  
65 World Bank (2007).

- 66 For an overview of the issues facing producer organisations, see C. Penrose-Buckley (2007).
- 67 J.L. Arcand (2004).
- 68 Research by Leuven University cited in Proceedings Report, Corporate Governance and Co-operatives, Peer Review Workshop, London, 8 February 2007.
- 69 U.S. Awasthi (2001).
- 70 C. Penrose-Buckley (2007) op. cit.
- 71 This view is supported largely by anecdotal evidence and theoretical expectations (e.g. B. Shiferaw, G. Obare, G. Murich, and H. Mukhong (2006); E. Chirwa et al. (2005); J. Hellin, D. White, and R. Best (2006)), rather than by significant statistical analysis. However, in Tanzania only around 3 per cent of rural households are estimated to be affiliated to POs, and the vast majority of these are smallholders producing cash crops, with above-average farm holdings.

- 195 R. Layard (2005).

- 196 This pattern emerges when countries are weighted by population. For an unweighted distribution, the finding is slightly different: at any given income, there is a range of reported levels of life satisfaction, with both 'content' and 'uncontented' countries, but as income rises, the dispersion decreases and countries converge on a higher level of life satisfaction. - 206 Based on exports of goods and services (BoP) (2010) <http://data.worldbank.org/indicator/BX.GSR.GNFS.CD>
- 207 China reduced levels of \$1-per-day poverty from approximately 32 per cent of its population in 1990 to 10 per cent in 2004, and Viet Nam from approximately 51 per cent in 1990 to 10 per cent in 2004. An important caveat to the poverty reduction story is that economic growth in both China and Viet Nam has driven (and been driven by) an enormous expansion of the informal urban industrial sector, where migrants are employed in often poor and dangerous conditions, with no social protection measures and poor wages in comparison with workers in the formal economy. Recent urban migrants are invisible in national poverty surveys, which measure only those with registered residents' status, and so 'new' urban poverty is likely to be significantly under-represented in official poverty data.

- 110 Much of this work draws on the 'new range ecology' of Scoones, Benkhe, Kerven, et al., which developed during the 1990s. Their work demonstrated that the underlying assumptions of equilibrium range ecology (such as fixed carrying capacities) and consequent solutions (such as destocking) were inappropriate to many parts of Africa. The spatial distribution of livestock rather than their number is what must be managed to avoid overgrazing, thus highlighting the critical importance of mobility in dry-land resource management. A more opportunistic approach to ecosystem management is essential in areas with high co-efficients of variation in rainfall. (Drawn from I. Birch and R. Grahn (2007).)

## 5 THE INTERNATIONAL SYSTEM

- 1 President Amadou Toumani Touré's opening speech at a Development Cooperation Forum in Washington, cited in Oxfam International (2006) 'Kicking the Habit: The World Bank and IMF Still Addicted to Economic Policy Conditionality'.
- 2 Ibid.; Oxfam International (2007) 'Pricing Farmers out of Cotton: The Costs of World Bank Reforms in Mali'; Direction de Production Agricole/Compagnie Malienne de Développement des Fibres Textiles (CMDT), estimates as at 31 December 2007.
- 3 One exception is the arm of the World Bank that lends to low-income countries, the International Development Association (IDA). Technically, this has a different structure from the main board of the Bank, and poor countries get 41 per cent of the vote in decisions made by the IDA board.

However, only a few of these countries are involved in setting the agreements that decide the IDA's policies, a process that takes place every three years. Here, as everywhere at the IFIs, it is the large donors who really make all the significant decisions.

- 6 World Bank (2007) World Development Indicators 2007.
- 7 J. Stiglitz (2006), p.37.
- 8 J. Williamson (2003) 'The Washington Consensus and Beyond'.
- 9 The conclusions can be found on the SAPRI website ([www.saprin.org](http://www.saprin.org)). According to the document summarising the project's findings, even though the Bank funded the exercise, it 'went to extraordinary lengths to bury SAPRI and its findings within the institution, as well as to lower its profile to the outside world. After insisting on joint actions throughout the exercise, management decided to write its own final report, which focused as much on its own in-house research as on SAPRI field work. ... At the conclusion of the forum, it immediately closed down the SAPRI process without any commitment to follow-up or any trace of the multi-year SAPRI analysis in any of its internal documents.'
- 10 Agricultural liberalisation played a part in all major World Bank lending during the 1990s (see for example Fiscal Restructuring and Deregulation Programmes 1–3). Lending conditions relating to agriculture, for example the abolition of the state marketing board in Zambia and the reform and privatisation of the Agricultural Development and Marketing Corporation (ADMARC) in Malawi, also played a part in IMF lending during this time. The sequence of agricultural liberalisation in Zambia is detailed in N. McCulloch et al. (2000). The main lending instruments were the Policy Framework Paper drawn up between the Government of Zambia and the IMF in 1990 and the two related Enhanced Structural Adjustment Facilities in 1991 and 1995. The sequence of adjustment for Malawi is detailed in S. Devereux (1997). The first key commitment was in the second Structural Adjustment Loan in the 1980s. In 1994, the country's currency was devalued, leading to a massive increase in fertiliser prices, and all fertiliser subsidies were removed a year later as a result of World Bank and IMF lending conditions. In both countries, the influence and responsibility of the major bilateral donors on this issue was also very relevant, and particularly 'the shortsighted and erratic activities which characterise ... what the major donors term as policy' (M. Blackie, personal communication).

Cundy (2007) 'Carbon funds: paying up to cut emissions', in *Environmental Finance*, July–August 2007, pp.20–2; and World Bank (2011) 'State and Trends of the Carbon Market 2011', Washington: World Bank, [http://siteresources.worldbank.org/INTCARBONFINANCE/Resources/StateAndTrend\\_LowRes.pdf](http://siteresources.worldbank.org/INTCARBONFINANCE/Resources/StateAndTrend_LowRes.pdf)
- 264 M. Lockwood (2007).
- 265 For a detailed proposal of the reforms required to the CDM, see J. Cozijnsen et al. (2007).
- 266 In the UK, for example, the Carbon Reduction Commitment is a complex cap-and-trade scheme for UK commercial and retail companies (plus large public sector organisations) not currently covered by the EU trading scheme, with auctioning of permits and revenue recycled according to an obscure formula. Much of the emissions reduction will come about anyway under new building regulations. Although the scheme will draw the issue to the attention of CEOs, the same result could arguably have been achieved simply by passing a few statutory regulations on carbon emissions, or knocking a few heads together in boardrooms. In 2011, the Coalition Government responded to criticism of the CRC by introducing measures to simplify the process. For a full breakdown of the new CRC Energy Efficiency Scheme, see [http://www.decc.gov.uk/en/content/cms/emissions/crc\\_efficiency/simplification/simplification.aspx](http://www.decc.gov.uk/en/content/cms/emissions/crc_efficiency/simplification/simplification.aspx) (Matthew Lockwood, IPPR, personal communication).
- 267 The 2001 Third Assessment Report was prepared by 122 co-ordinating lead authors and lead authors, 515 contributing authors, 21 review editors, and 337 expert reviewers. See <http://www.ipccfacts.org/how.html>
- 268 M. Hertsgaard (2006).
- 269 The Investor Network on Climate Risk, which represents more than \$4 trillion in assets managed by 65 institutional investors, lobbies governments to require more rigorous disclosure of emissions and other information by companies. The Carbon Disclosure Project, whose members have an extraordinary \$41 trillion under management (close to the

value of global GDP) seeks information on the business risks and opportunities presented by climate change and greenhouse gas emissions data from the world's largest companies – 2,400 in 2007.
