FISCAL POLICIES FOR GENDER EQUALITY:
Why we need increased public investments in care-related infrastructure and services — including secondary & supervision hours, the time women spend on care work exceeds 10 hours a day

PUBLIC INVESTMENTS IN CARE-RELATED SERVICES AND INFRASTRUCTURE CAN HELP

This is also generalizational: Boys and girls interviewed in both countries spend more than 5 hours a day on care work.

These levels & inequalities of care work have negative implications for women and children's welfare and the wider economy.

WOMEN'S WELLBEING:
24% 18% of women had left a child under 6 alone, due to heavy workloads. This contributes to the global childcare crisis

UNEQUAL PARTICIPATION IN MARKET ECONOMY
