

EVERYONE COUNTS

Unit 1: Welcome to Young Lives

UNIT 1 SESSION 4

Challenging assumptions

WHAT DO YOU KNOW?

Ethiopia

India

Peru

Viet Nam

- What do you know about the four Young Lives countries already?
- What words would you associate with these countries?

WHICH COUNTRY?

- Have a look at the following images.
- Each photograph was taken in one of the four Young Lives countries.
- Which country do you think each photograph is from?
- Why do you think this?

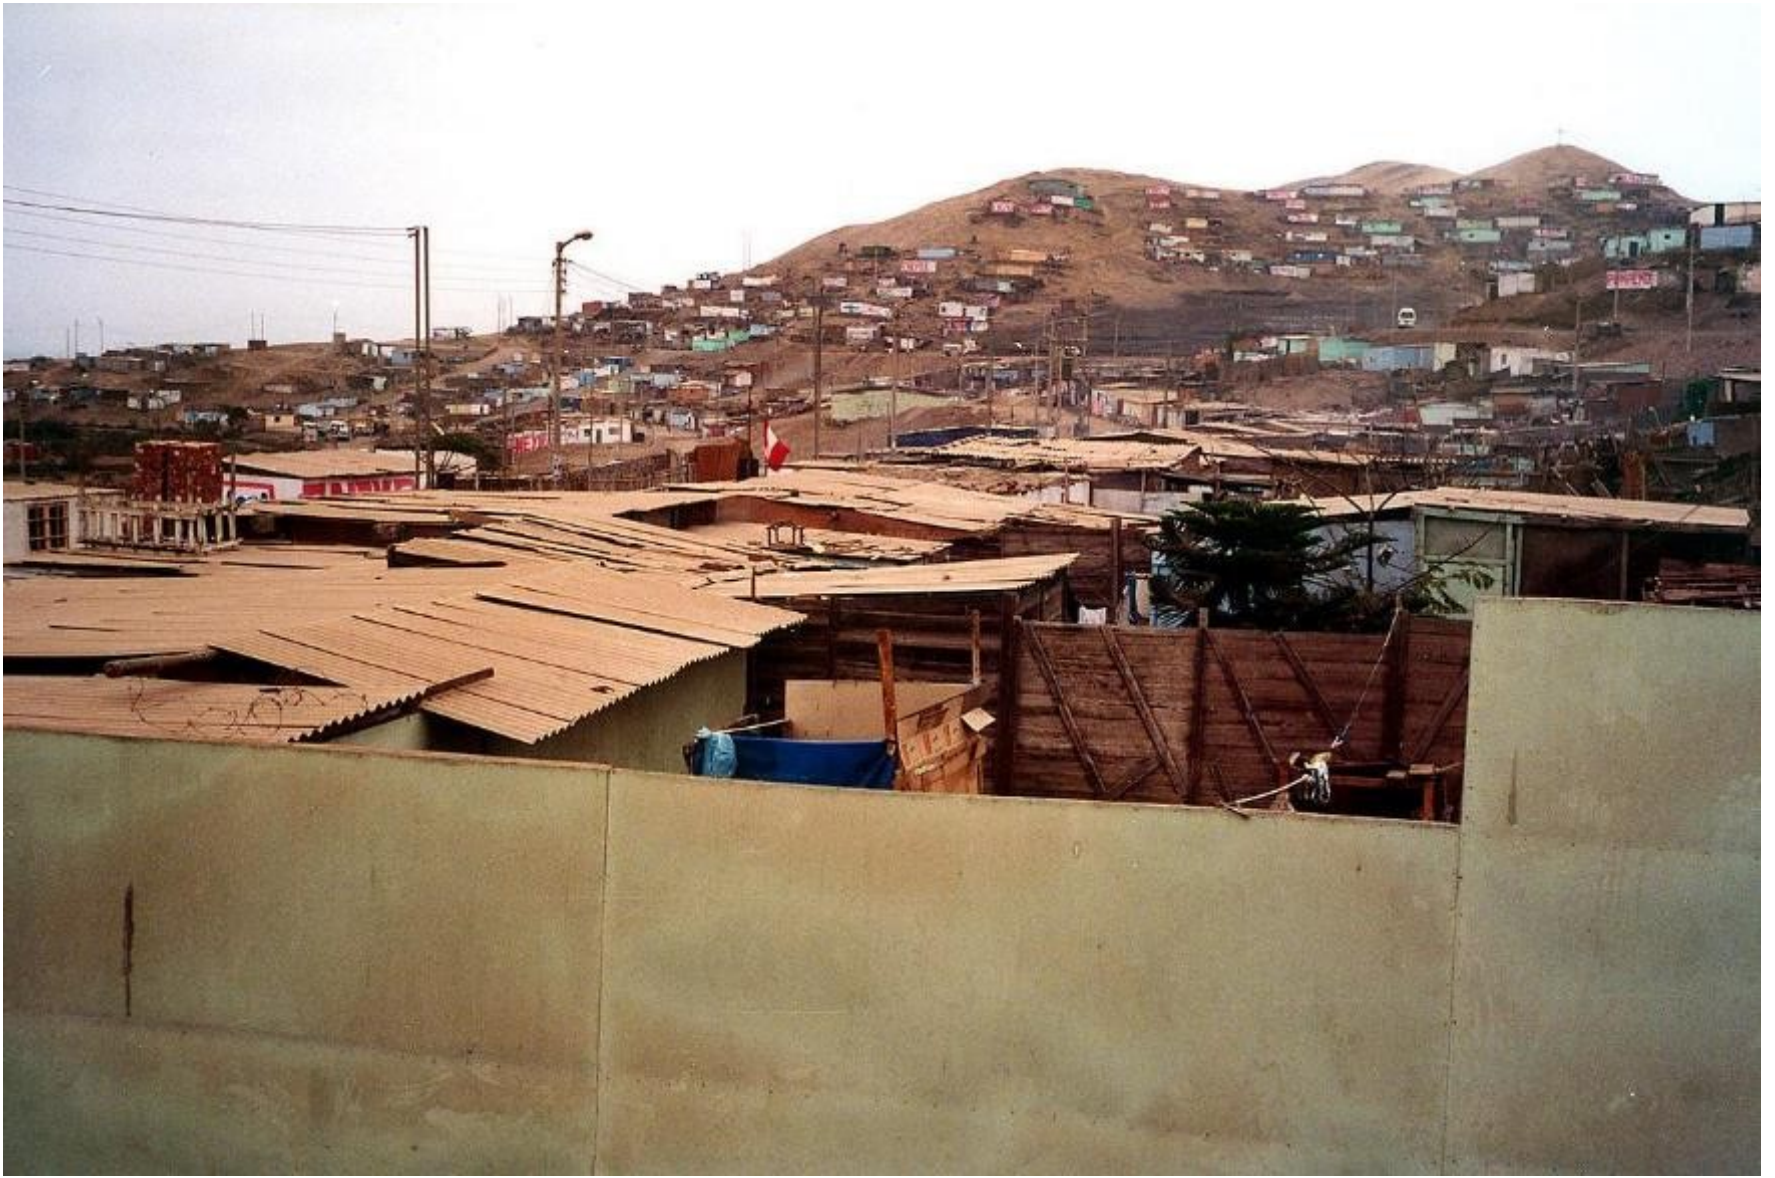

UNIT 1 SESSION 5

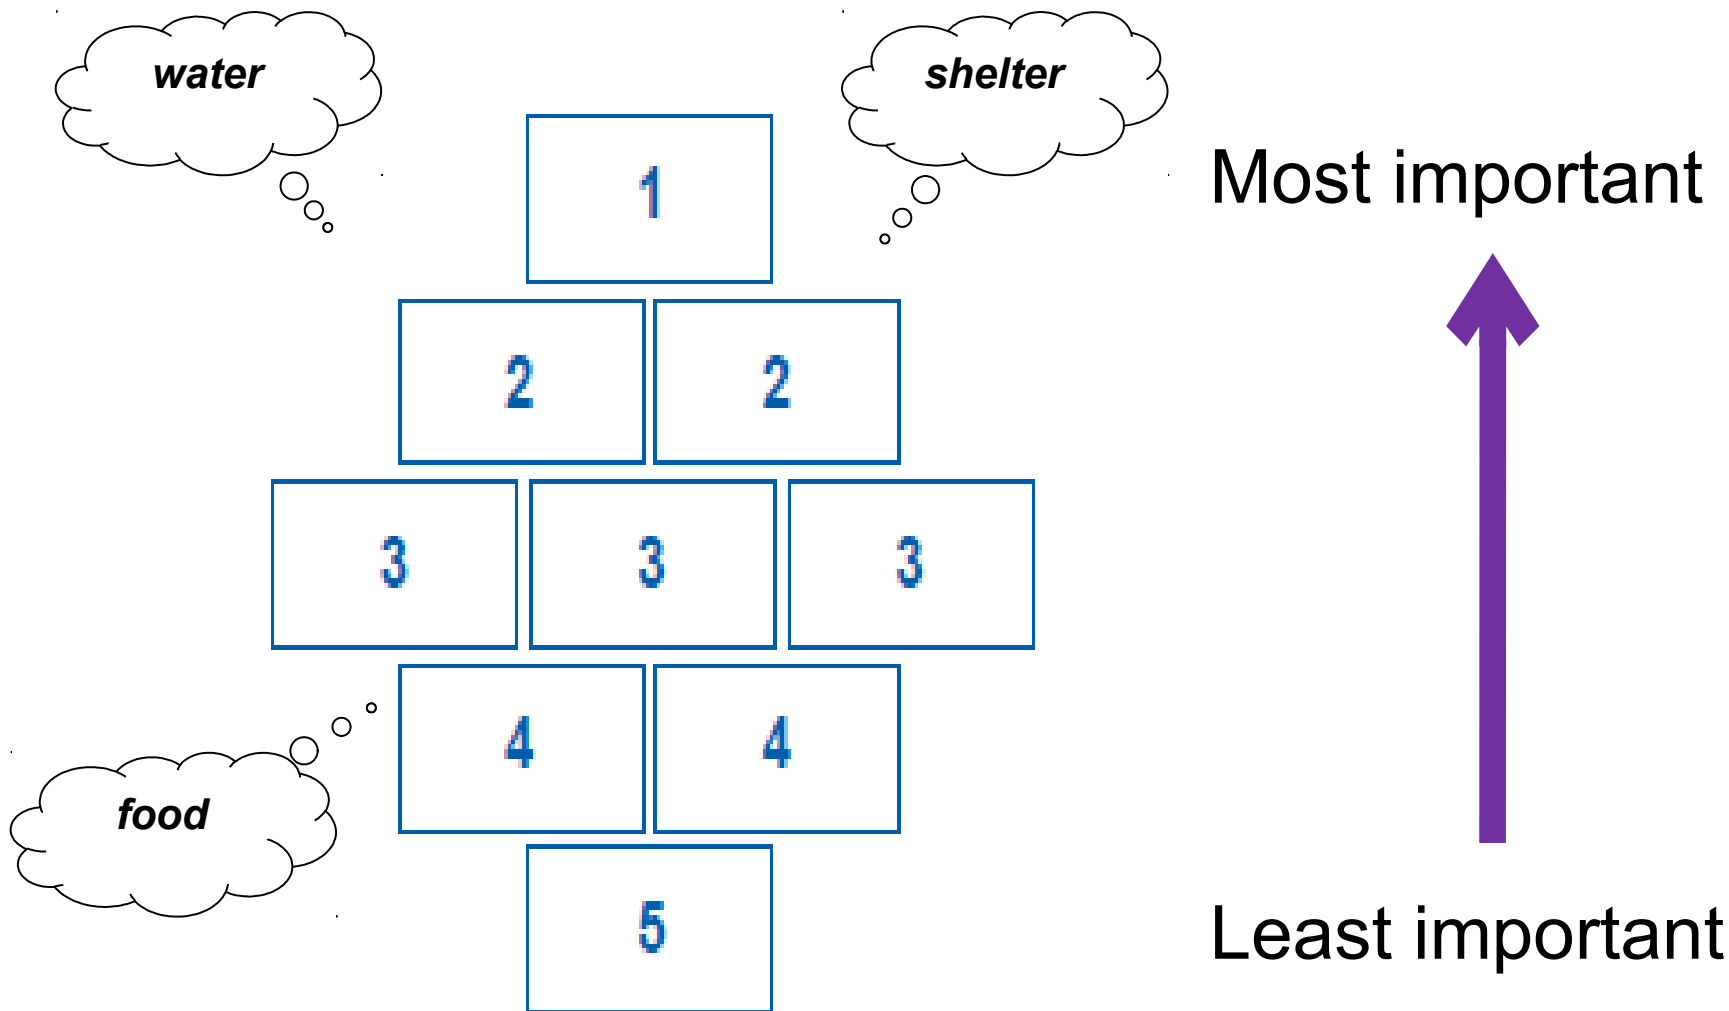

What does it mean to do well in life?

WHAT DO WE NEED TO BE DOING WELL IN LIFE?

- Think
- Pair
- Share

RANKING YOUR IDEAS

SEBLE

ETHIOPIA

Having cattle, sheep, chicken, donkey, horse and mules.

Having a house with a corrugated iron/tin roof (rather than one made of grass/thatch).

Being able to get medical treatment if you're sick.

Having enough good-quality household furniture.

Having good food, like meat, fish, *injera**, *shiro** and eggs.

Having enough good-quality clothes.

Having enough kitchen equipment.

Being able to play with friends.

LUZ

PERU

Receiving love from your parents.

Father and mother are working.

Having parents to take care of you.

Having friends.

Having parents who don't fight.

Having a nice home.

Not having to work.

Being able to study well.

TIME TO THINK...

What similarities and differences are there?

Do you think everyone in the world has the things they need to be 'well'? Why not?

UNIT 1 SESSION 6

What does inequality mean?

WHAT DOES INEQUALITY MEAN?

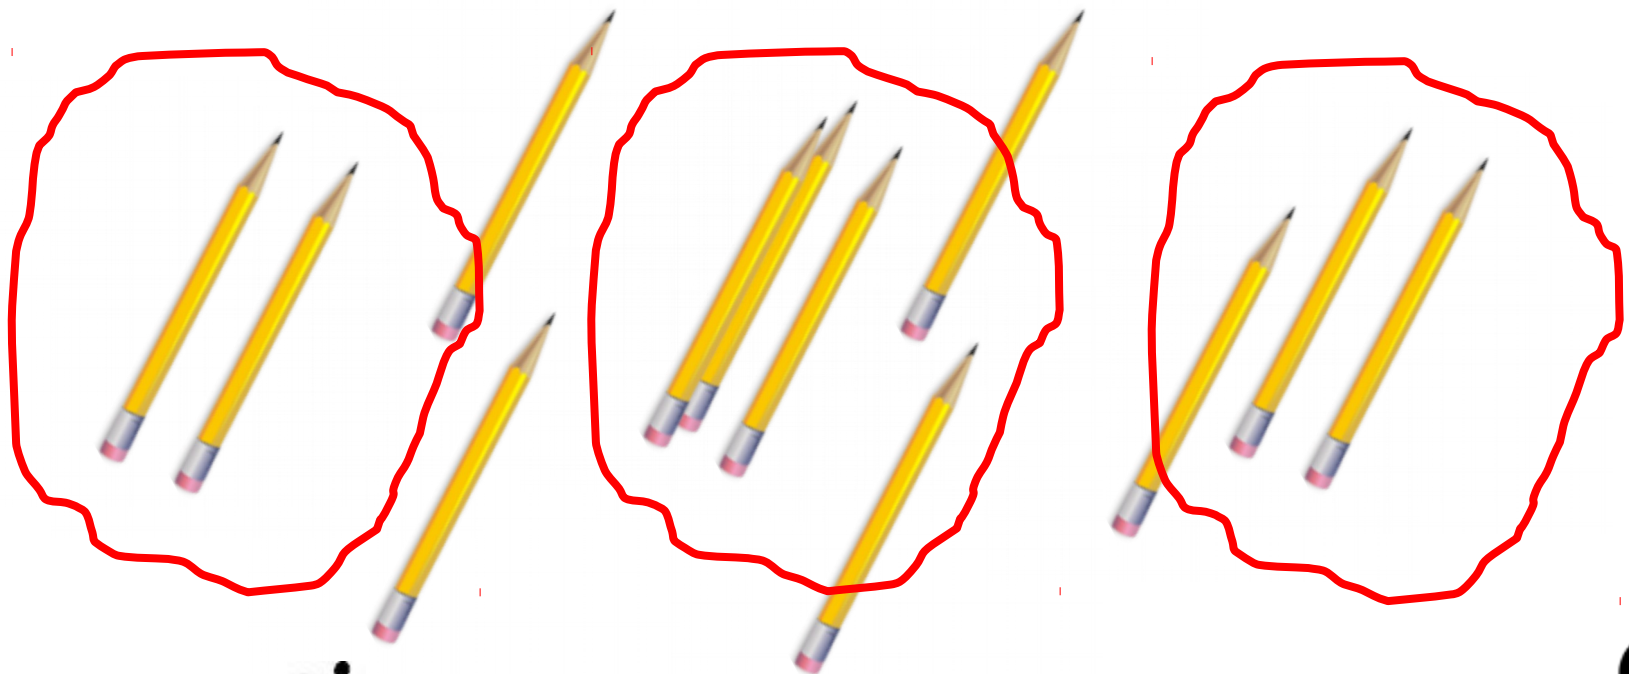

We can think of inequality as the difference between the things some groups of people have compared to other people.

It is a bit like looking at how big a slice of cake one person has compared to another.

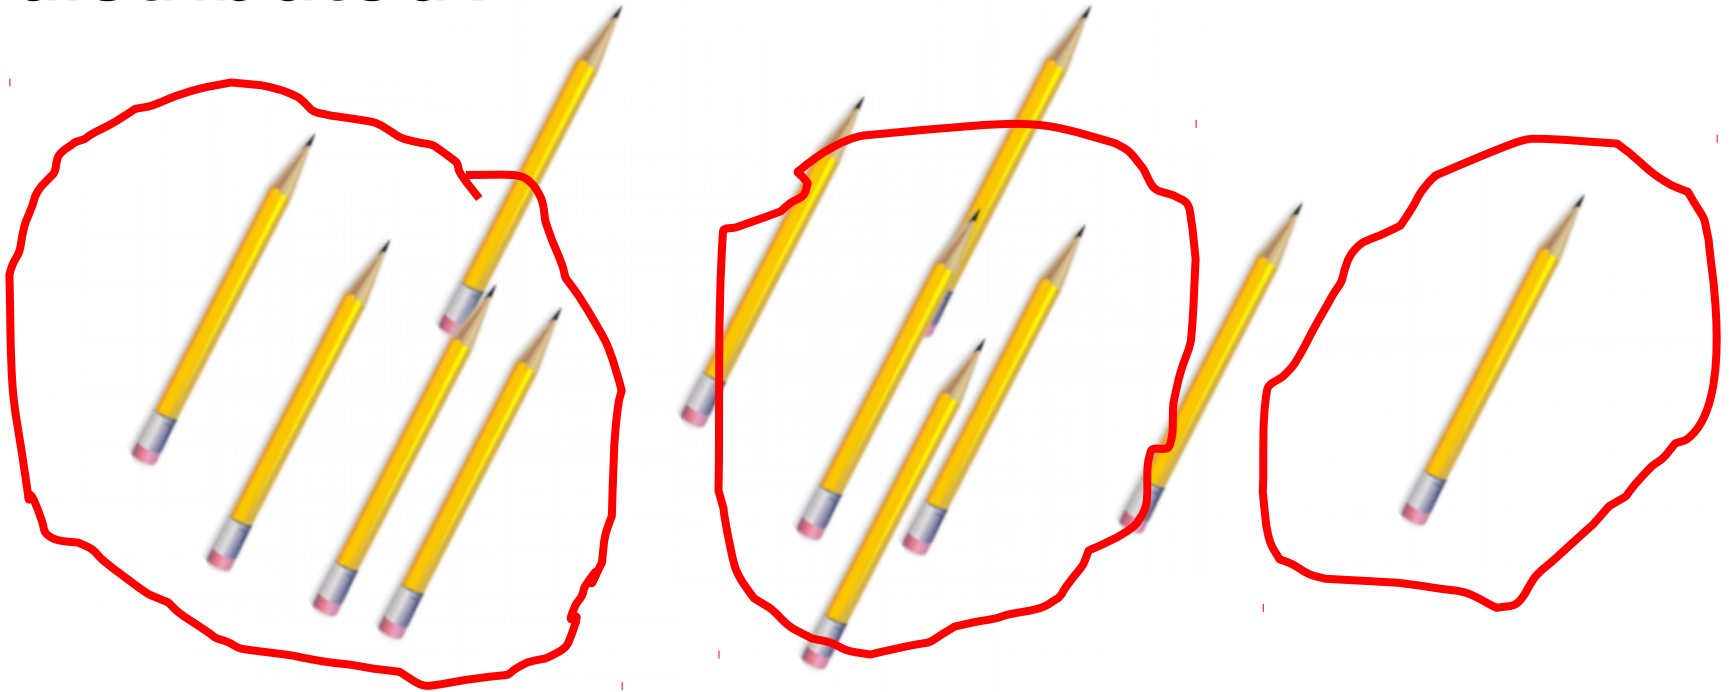

EQUAL SHARING

Imagine that you have a set of six pencils and three children. How would you share out the pencils equally?

UNEQUAL SHARING

How would you share out the pencils so that they were unequally distributed?

SHARING OUT THE PENCILS

What are all the possible ways in which the pencils could be shared out?

What different combinations are there?

How will you make sure that you find all the possible combinations?

Is there a logical way to solve this problem?

INEQUALITY BETWEEN COUNTRIES

There is inequality between countries in the world.

This means things are not shared fairly between countries.

For example, some countries are wealthy while others are extremely poor.

INEQUALITY WITHIN COUNTRIES

There is also inequality within countries.

This means things are not shared fairly within the same country.

For example, some people may have more money than others.

THINKING ABOUT INEQUALITY

Inequality is not just about how money is shared between and within countries.

There can also be inequality in the kinds of opportunities people have in life.

THINKING ABOUT INEQUALITY

INEQUALITY
