# What is COVID-19?

- Coronaviruses are a large family of viruses that are known to cause a range of illnesses from the common cold to more severe diseases such as Severe Acute Respiratory Syndrome (SARS).
- The current pandemic is caused by a new strain of coronavirus that hasn't previously been seen in humans.
- The disease caused by this virus is called COVID-19.

# WRISTS

0:00 / 0:54

For many people  
living in poverty,  
this is a crisis on  
top of a crisis.

# True or false?

It only affects older people.

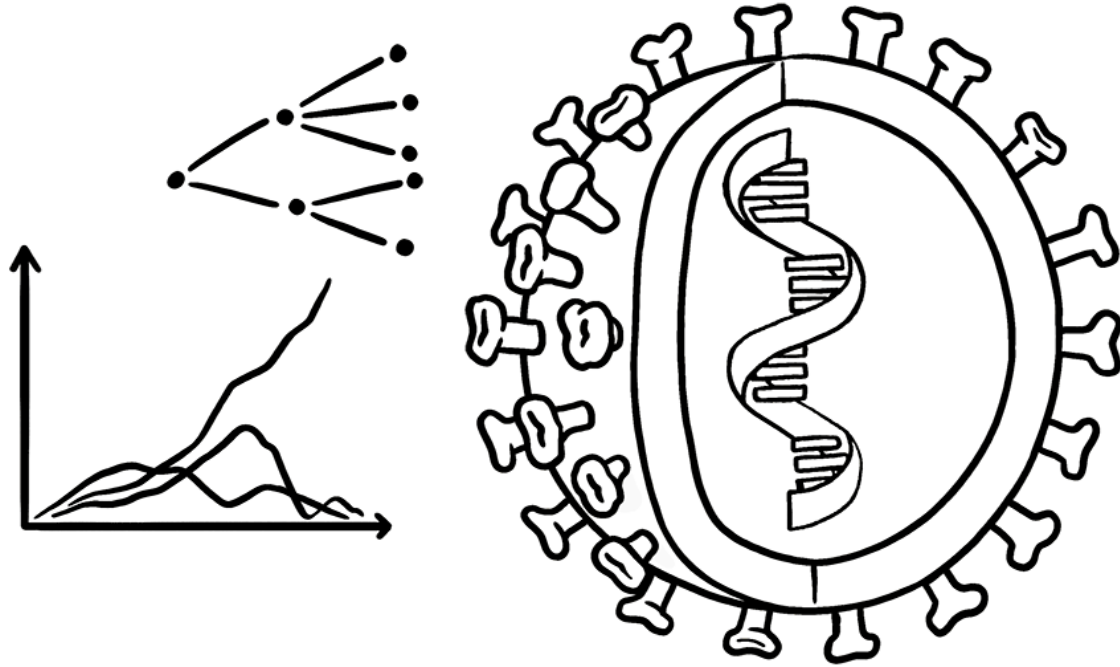

Swimming can transmit the COVID-19 virus.

5G mobile networks can spread COVID-19.

COVID-19 is just like the flu.
